EDUCATION

Bachelor of Science, May 2028

The University of Alabama, Culverhouse College of Business, Tuscaloosa, AL

Majors: Management Information Systems

Minor: Business Cybersecurity

GPA: 3.0/4.0

WORK EXPERIENCE

Student Assistant: Athletics IT, August 2025 – Present

The University of Alabama, Tuscaloosa, AL

- Work in technology maintenance ensures that any technological issues are addressed and resolved promptly with utmost respect.
- Diagnose and resolve any printer issues ensuring that all athletic staffers could print, copy, and scan efficiently with no errors.
- Help with any network or server issues that would occur at all athletics facilities and Bryant-Denny Stadium.

Summer Lifeguard, May 2025 – August 2025

Wild Water, Cullman, AL

- Monitored pool and surrounding facilities to ensure swimmer safety, proactively identifying and addressing hazardous conditions per Red Cross safety protocols.
- Enforced pool rules and emergency action plans, responding quickly and effectively to incidents, including administering first aid and CPR when necessary.
- Provided customer service by aiding patrons with questions, keeping a clean and organized environment, and supporting daily opening and closing procedures.

Welder, May 2023 – July 2024

Inland Buildings, Cullman, AL

- Performed welding improvements, showing strong work ethics and responsibility while contributing to daily business operations.
- Developed communication skills by communicating with other project managers, ensuring all projects would be able to get done on time and up to AWS standards.
- Built teamwork and collaboration skills by working closely with other employees to complete projects efficiently and in a timely manner.

PROJECT EXPERIENCE

Database Management Systems Analysis (Python & ML), May 2026

The University of Alabama, Tuscaloosa, AL

- Built a Python analytics pipeline that transforms raw financial ledger data into descriptive, predictive, and prescriptive insights.
- Engineered KPI computation for profitability and efficiency metrics, including margin, expense ratio, growth, ROA, ROI, and inventory turnover.
- Added production-style quality controls: schema/category validation, structured JSON artifacts, automated test, and GitHub Actions CI.

Sports Analytics GM Dashboard, Python, Spring 2026

The University of Alabama, Tuscaloosa, AL

- Developed a menu-driven Python application to analyze sports data, enabling users to evaluate player statistics, team compositions, and specific performance metrics.
- Built a custom data extraction module utilizing standard Python libraries (csv, os) to parse external datasets, handling missing values and safely converting string inputs into actionable numeric data.
- Implemented advanced analytical logic—including itertools.combinations and custom lambda functions—to calculate aggregate metrics like PRA (Points, Rebounds, Assists) and identify top-scoring teammate pairings.

TECHNICAL LANGUAGES, FRAMEWORKS, AND TOOLS

Languages: Python, HTML, CSS

Frameworks: Entity Framework, Django

Environments: MS Windows, Mac OS

Tools: Visual Studio, MS Office Suite, Jira, GitHub
