EDUCATION

Bachelor of Science, May 2028
The University of Alabama, Culverhouse College of Business, Tuscaloosa, AL
Major: Management Information Systems Minor: Business Cybersecurity
GPA: 3.0/4.0

WORK EXPERIENCE

Student Assistant: Athletics IT, August 2025 – Present
The University of Alabama, Tuscaloosa, AL

- Serve as on-site technical support across university athletics facilities, troubleshooting hardware and connectivity issues on the spot to keep coaches, staff, and daily operations running without delay.
- Diagnose and resolve technology issues — including workstations, printers, and peripheral equipment — for athletics department staff, minimizing downtime and keeping day-to-day operations running smoothly.
- Diagnose and resolve network and server issues across athletics facilities and Bryant-Denny Stadium, ensuring reliable connectivity for day-to-day operations and gameday events.

Marketing Technology Intern, June 2026 – August 2026
Mission Pet Health, Birmingham, AL

- Built and fine-tuned conversational AI phone agents to handle live veterinary calls in line with hospital protocols and client care standards, scaling the system to 900+ clinics nationwide.
- Developed Python scraping and parsing scripts in Cursor to automate call-transcript analysis, surfacing key phrase trends and AI performance benchmarks that shaped ongoing model tuning.
- Architected a location-tagging system spanning 900+ clinic knowledge bases to organize and route prompts by site, streamlining deployment network-wide and cutting manual configuration work.

PROJECT EXPERIENCE

Full Stack Insurance Website Developer, Fall 2026
The University of Alabama, Tuscaloosa, AL

- Initialized the centralized Git repository, set up core development environments, and structured relational database migrations for a multi-tenant renters insurance web application serving Peach Shield.
- Co-developed responsive front-end components and architected the integration roadmap for an LLM-driven AI assistant to guide applicants through policy inquiries and automated form completion.
- Collaborated across a four-developer Agile team to transition Peach Shield from a manual phone-in intake model to an automated web platform featuring real-time rating calculations, strict eligibility validation, and back-end persistence.

Database Management Systems Analysis (Python & ML), May 2026
The University of Alabama, Tuscaloosa, AL

- Designed a Python analytics pipeline transforming raw financial ledger data into descriptive, predictive, and prescriptive insights.
- Engineered KPI calculations for profitability and efficiency, including margin, expense ratio, growth, ROA, ROI, and inventory turnover.
- Implemented production-grade quality controls, including schema validation, JSON outputs, automated testing, and GitHub Actions CI.

Sports Analytics GM Dashboard, Python, Spring 2026
The University of Alabama, Tuscaloosa, AL

- Built a menu-driven Python application enabling users to evaluate player statistics, team compositions, and performance metrics.
- Developed a custom data extraction module using Python's csv and os libraries to parse datasets and convert raw inputs into usable numeric data.
- Applied advanced logic—including Combinations and lambda functions—to compute PRA and identify top-performing teammate pairings.

TECHNICAL LANGUAGES, FRAMEWORKS, AND TOOLS

Languages: Python, JSON, C#, HTML, CSS, JavaScript, SQL
Frameworks: Entity Framework, Django, .NET, Ollama
Operating Environments: MS Windows, macOS
Business Tools: Visual Studio, Cursor, MS Office Suite, Jira, GitHub, PowerBI

HONORS AND ACTIVITIES

MIS Student Ambassador, Alabama Information Management Society, Alabama Advantage Scholar, UA AI Club, Harvard Business Impact Pilot Activity
